Applied for TLD (string)	LLP

Response:

myLLP GmbH (myLLP), as an Applicant for the .LLP TLD, is pleased to submit this response to the GAC Buenos Aires Communiqué.

myLLP supports the efforts of ICANN and the Governmental Advisory Committee (GAC) to deploy the new TLDs in a safe, secure and responsible manner. As detailed in our application, myLLP will design and position the .LLP TLD to be known as one of the premiere professional resources on the Internet. The mission of the .LLP TLD is to provide businesses a namespace on the Internet to establish meaningful and relevant identities and to promote their LLP entity. The primary purpose is to foster a sense of professionalism and trust among customers, businesses and organizations.

In its Buenos Aires Communiqué, the GAC “highlights the importance of its Beijing advice on 'Restricted Access' registries, particularly with regard to the need to avoid undue preference and/or undue disadvantage.” myLLP is committed to allow registrations in all jurisdictions where LLP is used as a corporate identifier, and will operate the TLD in a transparent manner consistent with general principles of openness and non-discrimination. Specification 11 of the Registry Agreement commits the Registry Operator to “operate the TLD in a transparent manner consistent with general principles of openness and non-discrimination by establishing, publishing and adhering to clear registration policies.” myLLP fully supports this premise and urges ICANN to ensure that the GAC’s Advice in this regard is entirely implemented.

myLLP understands that the commitment for a non-discriminatory operation of gTLDs, as manifested in the ICANN bylaws¹ as well as in the Approved Resolution of the NGPC in realization of the GAC Beijing advice², has special importance in the Corporate Identifier field. This commitment signifies that LLP corporations all over the world are entitled to an equal chance to strengthen their web presence and business, no matter which jurisdiction or state

they are operating from. In no case should any legal LLP entity be excluded from the ability to register domains under the TLD .LLP due to questionable restrictions - particularly not under the guise of a community application taking precedence over other applicants.

myLLP would also like to reiterate that it is committed to registrations under .LLP as postulated in the GAC Beijing communiqué in the form suggested in the NGPC implementation plans³. myLLP will gladly cooperate with relevant national supervisory authorities in this regard.

Additionally we strongly support the NTAG letter “Implementation of Category 1 and Category 2 GAC Advice” from the 20th December 2013 and are looking forward to proceed with our application.
