

## Test SMDs Repository

The following test SMD files have been provided to assist implementers of the SMD technology in testing their own implementations.

### Agent/Holder Trademarks:

Based on the data elements provided, SMDs can be classified in two types:

- SMDs generated for marks managed by a Trademark Agent – the string "Agent" in the filename indicates an SMD of type Agent.
- SMDs generated for marks managed by Trademark Holders directly – the string "Holder" in the filename indicates an SMD of type Holder.

### Language:

Test SMDs have been generated with data (not headers) in the following languages:

- English
- Russian
- Arabic
- Chinese
- French

Note: SMDs in languages other than English include IDN labels (<mark:label>).

The language of the SMD is specified in the test SMD filename.

### Active/Revoked SMDs:

- The string "Active" in the filename indicates that the SMD has NOT been revoked (**NOT** included in the SMD Revocation List).
- The string "Revoked" in the filename indicates that the SMD has been revoked (**INCLUDED** in the SMD Revocation List).

### x509 certs:

The test SMD ICANN-CA certificate can be found here:

[https://ca.icann.org/tmch\\_pilot.crt](https://ca.icann.org/tmch_pilot.crt)

Note: This CA certificate is for testing purposes only and is not the production CA.

The test SMD ICANN-CA CRL can be found here:

[http://crl.icann.org/tmch\\_pilot.crl](http://crl.icann.org/tmch_pilot.crl)

Note: This CRL is for testing purposes only and is not the production CRL.

### SMD Revocation List:

The test SMD Revocation List can be found here:

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-test-revocation-15jul13-en.csv>

## SMDs

The following test SMDs are Active (**NOT** included in the SMD Revocation List, signed with a non-revoked TMV certificate and the XML signature is valid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-active-15jul13-en.zip>

The following test SMDs are Revoked (**INCLUDED** in the SMD Revocation List, signed with a non-revoked TMV certificate and the XML signature is valid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-revoked-15jul13-en.zip>

The following test SMDs are Active (**NOT** included in the SMD Revocation List, signed with a non-revoked TMV certificate and the XML signature has been tampered with, to make it invalid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/smd-invalid-15jul13-en.zip>

The following test SMDs are Active (NOT included in the SMD Revocation List, signed with a revoked TMV certificate and the XML signature is valid):

<http://newgtlds.icann.org/en/about/trademark-clearinghouse/tmv-cert-revoked-15jul13-en.zip>
