

## Test SMDs repository

The following files are provided for testing purposes only.

### Active/Revoked test SMDs:

- The string "active" in the filename indicates that the test SMD has NOT been revoked (i.e. the test SMD is not included in the [test SMD Revocation List](#)).
- The string "revoked" in the filename indicates that the test SMD has been revoked (i.e. the test SMD is included in the [test SMD Revocation List](#)).

### Certificate Authority files:

The test SMD ICANN-CA certificate may be found [here](#).

The test SMD ICANN-CA CRL may be found [here](#).

### SMD Revocation List:

The test SMD Revocation List may be found [here](#).

### Test SMDs:

Four test SMDs may be found [here](#).

1. Active SMD: this test SMD is active, signed with a non-revoked TMV certificate (i.e. the TMV certificate is not included in the [test SMD ICANN-CA CRL](#)) and the XML signature is valid.
2. Revoked SMD: this test SMD is revoked (i.e. the SMD is included in the [test SMD Revocation List](#)), signed with a non-revoked TMV certificate and the XML signature is valid.
3. Invalid SMD: this test SMD is active, signed with a non-revoked TMV certificate and the XML signature is invalid.
4. Revoked TMV Certificate: this test SMD is active, signed with a revoked TMV certificate and the XML signature is valid.
