The key/value pairs MUST begin with the key, followed by a colon and the value. One on each line. Spacing is optional.
A legal disclaimer MUST be present somewhere in the response. The disclaimer SHOULD be at the end of the response.
The values of EPP keywords MUST follow the requirements given in the Test Plan. The comparison should be case insensitive.

.

## Inputs

The following information will be needed as input for this test case:

| Id | Description | Type |
|---|---|---|
| TLD | The ASCII compatible name of the TLD | String |
| WhoisTestRegistrar | An existing registrar which has Whois data | String |

| Sida 8: [37] Borttagen | Författare |
|---|---|

The format of the responses MUST follow a semi-free text format, as outlined in section 2.1.3.2 of the Whois Test Plan.

## Environmental needs

Whois client software
IPv4 connectivity
<WhoisIPv4> from resolving <whois.nic.TLD> using the delegation data.

## Special procedural requirements

Abort the test if any Whois query takes longer than 10 seconds.

| Sida 8: [38] Flyttad till sidan 6 (Flytta #3) | Författare |
|---|---|

## Intercase dependencies

This test has no intercase dependencies.

## Ordered description of steps to be taken to execute the test case

| Sida 8: [39] Borttagen | Författare |
|---|---|

Make a query from each test node using the client software.
whois -h **<WhoisIPv4>** "registrar **<WhoisTestRegistrar>**"
Do a check if the response matches the format given in Whois TP, section 2.1.3.3.

The queried registrar name MUST be present in the response.

The key/value pairs MUST begin with the key, followed by a colon and the value. One on each line. Spacing is optional.

A legal disclaimer MUST be present somewhere in the response. The disclaimer SHOULD be at the end of the response.

The values of EPP keywords MUST follow the requirements given in the Test Plan. The comparison should be case insensitive.

## Special procedural requirements

Abort the test if any Whois query takes longer than 10 seconds.

## Intercase dependencies

This test has no intercase dependencies.

## Ordered description of steps to be taken to execute the test case

> Make two queries from each test node using the client software. At least one of them MUST give response with Whois data.
> whois -h **<WhoisIPv4> <WhoisTestNameServerName>**
> whois -h **<WhoisIPv4>** "nameserver **<WhoisTestNameServerIP>**"
> For each positive response, do a check if the response matches the format given in Whois TP, section 2.1.3.3.
>> The queried name server MUST be present in the response.
>> The key/value pairs MUST begin with the key, followed by a colon and the value. One on each line. Spacing is optional.
>> A legal disclaimer MUST be present somewhere in the response. The disclaimer SHOULD be at the end of the response.
>> The values of EPP keywords MUST follow the requirements given in the Test Plan. The comparison should be case insensitive.

## Objective

Multiple queries will be performed over IPv6 TCP connections on port 43. The objective is to verify the format of the responses.

## Inputs

The following information will be needed as input for this test case:

| Id | Description | Type |
|---|---|---|
| TLD | The ASCII compatible name of the TLD | String |
| WhoisTestDomain | An existing domain name which has Whois data | String |

## Outcome(s)

The format of the responses MUST follow a semi-free text format, as outlined in section 2.1.3.1 of the Whois Test Plan.

## Environmental needs

> Whois client software

> <WhoisIPv6> from resolving <whois.nic.TLD> using the delegation data.

## Special procedural requirements

Abort the test if any Whois query takes longer than 10 seconds.

## Intercase dependencies

This test has no intercase dependencies.

## Ordered description of steps to be taken to execute the test case

> Make a query from each test node using the client software.
> whois -h **<WhoisIPv6> <WhoisTestDomain>**
> Do a check if the responses match the format given in Whois TP, section 2.1.3.1.
>> The queried domain name MUST be present in the response.
>> The key/value pairs MUST begin with the key, followed by a colon and the value. One on each line. Spacing is optional.
>> A legal disclaimer MUST be present somewhere in the response. The disclaimer SHOULD be at the end of the response.
>> The values of EPP keywords MUST follow the requirements given in the Test Plan. The comparison should be case insensitive.
