

ICANN New gTLD Auction Schedule dated 19 March 2014

This Auction schedule has been developed based on an anticipated volume of 20 contention sets per event. However, several factors including self-resolution of contention sets, eligibility for the Auction, and postponement requests will affect the actual number of contention sets participating in each Auction Event. Because of these and other factors, the Auction event for a contention set is subject to change, and the schedule will be updated periodically to reflect the changes. Auction event and dates will be confirmed to the application primary contact via the customer portal at least 21 days prior to the Auction.

The most current contention set status information is available on the contention set status page: https://gtldresult.icann.org/application-result/applicationstatus/stringcontentionstatus

Below are the Auction Dates. On the following pages you will find a detailed listing of the contention sets planned for each Auction.
