

Community Priority Evaluation Process Review Update

2 June 2017

The following is an update on the ongoing Community Priority Evaluation (CPE) process review.

Background on CPE Process Review

At various times in the implementation of the New gTLD Program, the ICANN Board has considered aspects of CPE process, including certain concerns that some applicants have raised regarding the process. On [17 September 2016](#), the ICANN Board directed the President and CEO, or his designees, to undertake a review of the process by which ICANN has interacted with the CPE provider. In his [letter of 26 April 2017 to concerned parties](#), Chris Disspain, the Chair of the Board Governance Committee, provided additional information about the scope and status of the review. Below is additional information about the review, as well as the current status of the CPE process review.

CPE Process Review and Current Status

The scope of the review consists of: (1) review of the process by which the ICANN organization interacted with the CPE provider related to the CPE reports issued by the CPE provider; (2) review of the consistency in which the CPE criteria were applied; and (3) review of the research process undertaken by the CPE panels to form their decisions and compilation of the reference materials relied upon by the CPE provider to the extent such reference materials exist for the evaluations which are the subject of pending [Requests for Reconsideration](#).

The review is being conducted in two parallel tracks by [FTI Consulting Inc.'s \(FTI\)](#) Global Risk and Investigations Practice (GRIP) and Technology Practice. The first track focuses on gathering information and materials from the ICANN organization, including interviews and document collection. This work was completed in early March 2017. The second track focuses on gathering information and materials from the CPE provider. This work is still ongoing. FTI is currently waiting on responses from the CPE provider related to the requests for information and documents. The CPE provider is seeking to provide its responses to the information requests by the end of next week and is currently evaluating the document requests. Once the underlying information and data collection is complete, FTI anticipates that it will be able to inform ICANN of its findings within two weeks.

FTI was chosen to assist in the CPE review following consultation with various candidates. FTI was selected because FTI has the requisite skills and expertise to undertake this investigation. FTI's GRIP and Technology Practice teams provide a multidisciplinary approach to business-critical investigations, combining the skill and experience of former prosecutors, law enforcement officials and regulators with forensic accountants, professional researchers, anti-corruption investigators, computer forensic, electronic evidence and enterprise data analytic specialists.
