### Response:

The GAC Buenos Aires Communique addresses Geographic TLDs:

5. **Special Launch Program for Geographic and Community TLDs**

The GAC recognizes the importance of the priority inclusion of government and locally relevant name strings for the successful launch and continued administration of community and geographic TLDs.

The GAC appreciates that the Trademark Clearing House (TMCH) is an important rights protection mechanism applicable across all the new gTLDs and has an invaluable role to fulfill across the new gTLD spectrum as a basic safety net for the protection of trademark rights.

a. **The GAC Advises the ICANN Board:**

i. that ICANN provide clarity on the proposed launch program for special cases as a matter of urgency.

We agree with the GAC and urge the ICANN Board and New gTLD Program Committee to provide, as soon as possible, clarity on the launch program for geographic TLDs that will protect the priority of government and locally-relevant second-level domains.
