Applied for TLD (string)	SARL

Response:

mySARL GmbH (mySARL), as an applicant for the .SARL TLD, is pleased to submit these comments regarding the GAC Communiqué from the Beijing meeting.

mySARL supports the efforts of ICANN and the Governmental Advisory Committee (GAC) to deploy the new TLDs in a safe, secure and responsible manner. As detailed in our application, mySARL will design and position the .SARL TLD to be known as one of the premiere professional resources on the Internet. The mission of the .SARL TLD is to provide businesses a namespace on the Internet to establish meaningful and relevant identities and to promote their SARL entity. The primary purpose is to foster a sense of professionalism and trust among customers, businesses and organizations.

We appreciate the effort of the GAC in preparing the Beijing Communiqué as well as the opportunity presented by ICANN to offer our comments.

mySARL in general supports many of the elements of the GAC advice, including: WHOIS verification and checks; mitigations for abusive activity; security checks and documentation; prompt addressing of complaints; and the establishment of specific consequences for activity that violates mySARL policies. Above all, mySARL has already provided an Acceptable Use Policy (registrants have to comply with all applicable law) as part of its Public Interest Commitment (PIC).

mySARL has consulted relevant authorities on issues which were raised in the application process. Furthermore, we will operate in accordance with all applicable laws in relevant respective jurisdictions.

mySARL understands the need for adequate consumer protections upon the deployment of new TLDs, and we believe our application for the .SARL TLD as a corporate identifier meets or

exceeds ICANN’s requirements in this area. Additionally, mySARL has submitted the Public Interest Commitment (PIC); “Only companies that are registered as SARL qualify to be a registrant of a .SARL domain name. Such registration must be granted by a governmental body, or an organization authorized by a governmental body to issue such registration”.

With respect to the advice contained in the GAC Communiqué, we generally support the comments of the New TLD Applicant Group (NTAG), which will be submitted separately.
