

## ICANN New gTLD Auction Schedule dated 12 December 2014

This Auction schedule has been developed based on an anticipated volume of 20 contention sets per event. However, several factors, including self-resolution of contention sets, Auction eligibility, and postponement requests, will affect the actual number of contention sets participating in each Auction Event. Because of these and other factors, the Auction event for a contention set is subject to change, and the schedule will be updated periodically to reflect these changes. Auction Dates will be confirmed to the application primary contact via the customer portal at least 21 days prior to the Auction.

The latest contention set statuses, including Auction Dates for any contention set, are available on the contention set status page: <https://gtdresult.icann.org/application-result/applicationstatus/stringcontentionstatus>.

The table below contains Auction Dates and Times as well as Deposit Due Dates and Times. The subsequent pages show the list of the contention sets planned for each Auction, which, as mentioned above, is subject to change.

12	27-May-2015	20:00 UTC	20-May-2015	16:00 UTC

\*Auction Date and Time refer to the Auction Commencement Date and may not reflect Auction Manager's intention to provide Early Bidding-- a time period prior to the standard 30 minutes of bidding for Round 1.

### Updates to the Auction Schedule as of 12 December 2014

This version is updated to reflect eligible contention sets as well as accommodated postponements, which were provided to those where each member of the contention set requested a postponement.

In addition, the Planned Auction Dates, shown above, from March through May 2015 have each been deferred one week as a result of feedback from the community and discussions with the auction provider.
