Scrolling the table to the right will reveal three more columns – Application Status, Application Updates, and Objections.

The screenshot shows a web browser window with the address bar displaying `gtdresult.icann.org/application-result/applicationstatus`. The page header includes the ICANN logo and the text "New Generic Top-Level Domains". Navigation links include "ICANN", "APPLICANT GUIDEBOOK", "TAS", "CUSTOMER SERVICE", and "CONTACT". A blue navigation bar contains "About", "Applicants", "Program Status", and "Announcements & Media".

The main heading is "New gTLD Current Application Status". To the right are links for "Download CSV" and "Download PDF". A search bar is present with a dropdown menu set to "String" and a "Search" button.

A yellow callout box with the text "...to reveal more columns." points to the last three columns of the application table: "Application Status", "Application Updates", and "Objections". These columns are circled in blue in the image.

The table below contains the following data:

Click the hyperlinked Yes to reveal...

If there is a Yes in the column then that application has had a change made.

Clicking on the Yes will take you to the *Application Update History* page for that application. There you will be able to see and comment on the change that has been made.
